

Artem Sokolov

Senior Product Designer / Design Engineer · Spain, no visa sponsorship needed

Nine years designing B2B systems where a mistake is expensive: regulatory reports filed to a regulator, biosecurity for Disney, Netflix and JPMorgan. For the last two I have written the production React they ship on, so design and engineering are one job here, not two.

Experience

Datox UK

Design Engineer

Feb 2026 — Present · Contract

Rebuilt a live AI platform for regulatory reporting, the least forgiving software there is: a wrong number is a fine. The engine **Centralis Group** files its AIFMD Annex IV reporting on, built with support from the **FCA's Digital Sandbox**. Redesigned it from nothing, on the requirements of the people who file on it: eleven workflow stages, source files to a filed return, plus custom reports on the same engine. Prototyped every stage with the analyst who uses it daily, then the Head of Regulatory Reporting, QA and the CEO. **Wrote the production frontend** and shipped it behind an opt-in toggle while clients kept filing. Nothing rolled back.

Navian Group Sweden · Spain

Design Engineer

2023 — Feb 2026 · Lead Product Designer, 2023–2024

Stayte ex-Reviero · B2B2C. **Designed** the system a real-estate agency runs on, lead to closed deal: 7,000+ leads processed, ~200 deals closed. **Built** it too, with a node-based editor that lets sales retune the AI agents without a developer.

Navian Enterprise SaaS. **Designed** a capital lifecycle platform that replaced a 50-sheet Excel model: nine roles on one deal, land owners to investment bankers; presets cut 40% of deal setup. Design system on MUI and Storybook.

Flow Health USA

Senior Product Designer

2021 — 2023 · Solo, End-to-End

Designed a biosecurity platform used by Disney, Netflix and JPMorgan. Hid 90% of the medical data behind a traffic-light triage, so teams on set act on 50k+ employee records at a glance. No access to end users under HIPAA: validated every flow in client prototype sessions.

Propetly UK

Product Designer

2019 — 2021

Designed real-time auction bidding and market-intelligence tools for UK property traders.

Its.agency

Product Designer

2017 — 2019

Designed and delivered 12+ MVPs zero to launch: fintech admin panels and SaaS marketplaces.
